Claims 2, 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The percentages make these claims vague. It isn't clear what kind of percent is intended – equivalent, weight?

The term “an equivalent weight” of claim 2 should say “one equivalent”.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Radovich (4,452,924).

Radovich discloses reacting polyester polyols having the same molecular weight range (col. 1, lines 62-68) and made from the same acids and alcohols (col. 2, lines 20-45) with the same diisocyanates (top col. 5) using deficient stoichiometric amounts of diisocyanate (see Table I).
